

Regarding HR 4026 and XM Radio. I oppose this bill. As a OTR truck driver, I pay for this service because it helps me deliver loads of products all over the country. Local radio stations fade in and out and they do not provide me with the information regarding weather and traffic that I need, when I need it. I enjoy listening to the same radio station from coast to coast without any interruption. I get National news so I know when a severe storm is possibly affecting my family. I hear the news of road closures, so I can plan my route and avoid these areas.

XM radio is a valuable asset and provides me with the tools to do my job. I pay for this service and I want to be able to continue with XM just as it now operates.

Thank you for your support in allowing XM to continue.
